Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-7 are rejected under 35 U.S.C. 102(a) as being anticipated by Choi et al. (6,168,991).

Choi et al. disclose a method for fabricating a semiconductor device including a concaved capacitor device having a lower electrode (20), a capacitor dielectric film (22) of a perovskite type high dielectric constant or ferroelectric material formed on said lower electrode and an upper electrode (26) formed on said capacitor dielectric film, comprising a step of: forming a conducting film to be formed into said lower electrode including sub-steps of: depositing a lower conducting (20) film by sputtering on walls and a bottom of a recess formed in an insulating film (12) on a substrate (10); and depositing an upper conducting film (26) on said lower conducting film by CVD (See

Art Unit: 2823

Col. 4, lines 47-51 and Col. 6, lines 22-32); wherein said lower conducting film has a thickness of approximately 300Å to 500 Å; wherein said capacitor device is a stacked capacitor device; wherein the CVD could be carried out in an oxidizing atmosphere, because the materials of the upper electrode could be oxides (Col. 5, lines 14-17).
